Since 2010

Your Trusted Partner in Sustainable Business Transformation

3SG helps businesses uphold their commitment to global standards through comprehensive auditing, certification, verification, and assessment services.

Since 2010, we've partnered with global accredited certification bodies to provide comprehensive auditing, certification, and verification services for various programs and standards. These include:

- Sustainability Standards: Textile Exchange Standards (GRS, RCS, OCS, RDS, RWS), GOTS, and SFA.
- Verification Services: SLCP and the HIGG Index.
- ISO Certification: ISO 9001, ISO 14001, and ISO 45001.

Our Scope & Reach: Six Key Operational Pillars

3SG is dedicated to driving sustainable transformation through six key operational pillars

Digital Transformation & AI-Powered Storage for Compliance

We leverage cutting-edge AI and cloud-based data storage technology to store, collect, analyze, and optimize sustainable business data. This provides our clients with the crucial intelligence storage for storing, updating, and tracking its source, helping identify areas for improvement, providing our clients with the intelligence they need toward certification and assessment readiness.

Field Work Experience & On-Site Assessments

Our teams are fully qualified to conduct comprehensive on-the-field assessments against a wide range of industrial standards. We also partner with many reliable certified bodies to provide auditing, certification, and verification services for both customized and established industrial standards or schemes.

Guide Decision-Making for Certification & Assessment

Navigating the complexities of sustainability certifications and assessments is our specialty. We simplify this process by providing data-driven insights and streamlined workflows. 3SG helps clients meet diverse social and sustainability standards, guaranteeing both compliance and strategic alignment with all certification and assessment needs.

Capacity Building & Expertise Outsourcing

Empowering our clients is core to our mission. We develop and deploy an AI-driven learning portal, offering 24/7 access to training, workshops, and ongoing support. This equips our clients' human resources with the knowledge and skills to effectively implement their social and sustainable practices and strategic alignment with all certification and assessment needs. Manpower & Expertise Outsourcing. For seamless execution, we provide qualified and trained expertise. Our dedicated professionals support clients directly in implementing sustainable practices and successfully achieving their sustainability certifications and standards.

Visual Management Service

We implement visual management principles to provide a shared, real-time understanding of work processes and performance for all levels of an organization, using tools like boards, signs, and floor markings to make information easily accessible, enabling faster problem-solving, improved decision-making, and increased team accountability and performance. Employs signs, symbols, color-coding, floor markings, information boards, and digital dashboards to convey information. Provides a snapshot of the status of operations, allowing for immediate understanding of performance.

Supply Chain Management Service

Our Supply Chain Management Service focuses on building ethical and circular supply chains for our clients. We ensure ethical sourcing by rigorously vetting and auditing suppliers based on customer code of conducts and their technical requirement, promoting transparency through our base technology for end-to-end visibility, identifying and mitigating ethical risks and simultaneously building supplier capacity through continuous training and development.

Product Certification

Organic Content Standard

The Organic Content Standard (OCS) verifies the presence and amount of organic material in a final product and tracks the flow of a raw material from its source to the final product.

Key Features

- Minimum 95% or 100% organic content options
- Chain of custody verification
- Third-party certification
- Applicable to any organic material

Benefits

- Verified organic content claims
- Supply chain transparency
- Consumer confidence
- Flexibility for blended products
